DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-25, drawn to a pay-per-view delivery system, classified in class 725, subclass 104.
- II. Claims 26-45, drawn to a method for creating a three dimensional model of an environment, classified in class 345, subclass 419.
- III. Claims 46-53, drawn to a method for remote collaboration, classified in class 348, subclass 14.01.
- IV. Claims 54-55, drawn to a method for real time remote surveillance, classified in class 348, subclass 143.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a pay-per-view delivery system; invention II has separate utility such as a method for creating a three dimensional model of an environment; invention III has separate utility such as a method for remote collaboration, as in for example, video conferencing; and invention IV has separate utility such as a method for remote surveillance. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
